Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,3-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Cecil et al. (3,143,090).

Cecil et al. discloses an apparatus for aerating soil including substantially parallel first and second shafts, 47 rotatably coupled to a carrier, with first and second aeration tines 55, and wherein none of the second set of rotating planes overlap any of the first set of rotating planes as shown in figure 2. Cecil et al. also discloses a support shaft 22, and a cutting tube 55 coupled to a blade portion 57.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2,11-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cecil et al. (3,143,090).

Cecil et al. discloses an apparatus for aerating soil as described previously, but lacks specifying that the aeration tines extend radially from their shafts to a distance greater than one-half the separation distance of the shafts.

Art Unit: 3671

It would have been obvious to one of ordinary skill in the art at the time the invention was made to form the apparatus with aeration tines extending radially from their shafts to a distance greater than one-half the separation distance of the shafts since applicant has not disclosed that having the specific spacing solves any stated problem or provides any unexpected results, and it appears that the device would perform equally well with any spacing that eliminated interference between tines.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Applicant's election without traverse of Group I in the reply filed on 4/17/05 is acknowledged. Additionally, the examiner acknowledges that claims 1-24 are pending and that nonelected claims 18-23 are not necessarily limited to embodiments of a soil aerator system adapted to be coupled to a vehicle.
